Subject: RE: Question for Timing of Hearings within Public Comment Period

Normally we will have a comment period and make a decision about whether to hold a hearing after we review comments received during the comment period. When we have a hearing, we will set a second comment period and identify a closing date that is about seven days after the hearing.

Subject: Question for Timing of Hearings within Public Comment Period

Karen/Steve: given that both of your DI programs have been involved with permit-related public hearings recently, have these hearings typically been held at or near the close of the public comment period, or was the public comment period long enough to allow some additional time (e.g., two weeks) for folks to comment after the hearing?

Your reply will help inform some decisions we need to make on the timing of our Dewey Burdock uranium ISR hearings within the public comment period.
